

GDP correlates with many development indicators

One dot = one country, at its most recent observation. All four relationships are strong at low incomes and flatten out at high incomes.

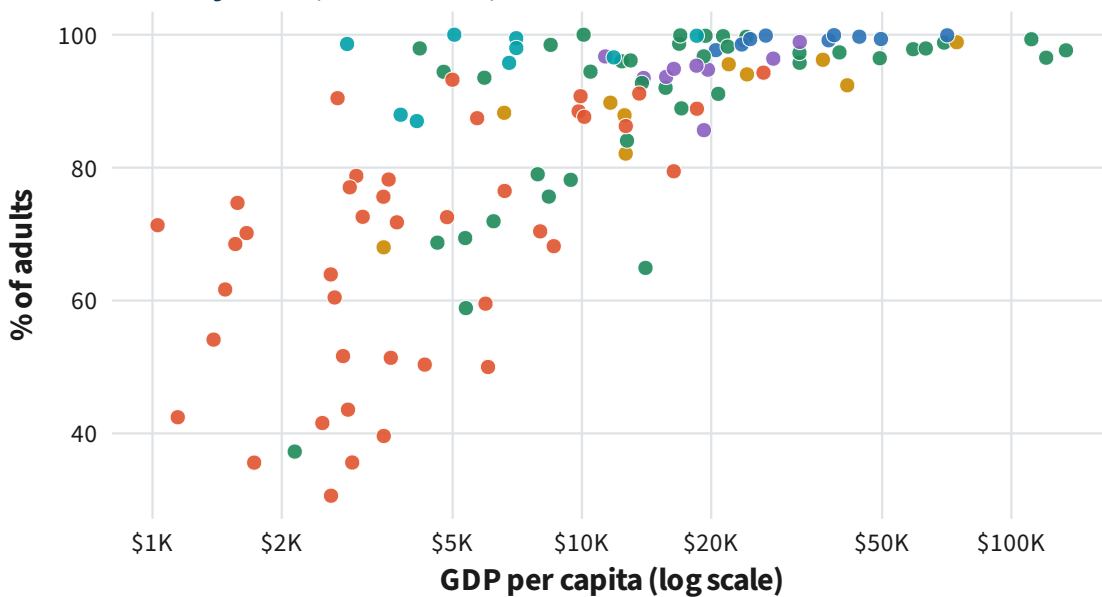

Average years of schooling (2022-2023)

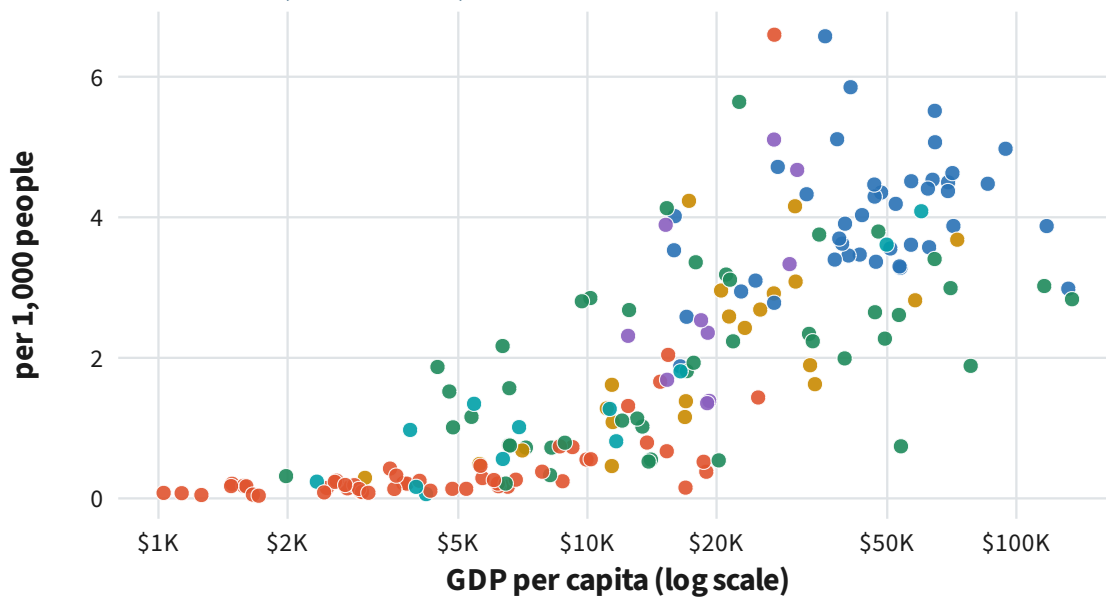

Child mortality (2022)

Adult literacy rate (2016-2024)

Medical doctors (2014-2023)

● Europe ● Africa ● Asia ● North America ● South America ● Oceania
